EXPERIENCE

Deltologic   *07/2023 - Present*

Senior Full Stack Software Engineer (.Net, Node.js, React, AWS)
- Played a crucial role in saving a failing medium sized AWS .NET project resulting in a stable application with reduced operational costs
- Successfully cleaned up and migrated a big .NET Framework project to .NET 8 and ABP.io, enhancing app maintainability and modularity
- Introduced OpenTelemetry usage at the company resulting in faster bug analysis
- Took over and lead client's contractor to successfully finish major app modernization effort
- Actively contributed to internal libraries and development tools
- Introduced AWS superwerker usage which led to safer AWS configuration and easier app environment creation
- Chose optimal Chrome extension tech stack which led to multiple quick and successful Chrome extension implementations in the company
- Responsible for implementation of small to medium sized Node.js/.Net projects, including AWS lambda APIs, ECS apps and Chrome extensions

CapGemini   *04/2022 - 06/2023*

Full Stack Software Engineer (.Net)
- Successfully negotiated with the client to allow usage of JetBrains tools in the project
- Successfully convinced the client to introduce CI/CD pipelines in the project
- Responsible for development of ASP.NET MVC (.NET Framework) app

Inetum   *01/2021 - 03/2022*

Junior Full Stack Software Engineer (.Net, React)
- Successfully implemented multiple .Net Core microservices
- Prepared a Android Virtual Device configuration mirroring production device for use in Xamarin developed by whole team
- Responsible for maintenance of a .NET Framework web app with React frontend
- Responsible for creation of new .NET Core web APIs

PREVIOUS EXPERIENCE

Junior QA Automation Engineer (Groovy, .Net, Azure)   *10/2019 - 12/2020*
Inetum

QA Automation Engineer Intern (Java, Groovy)   *07/2019 - 09/2019*
Inetum

EDUCATION

Poznan University of Technology, M.Eng   *09/2022*
- Contributed to ProcessM project (grant no. LIDER/14/0086/L-10/18/NCBR/2019)
